

West Wimbledon Primary School is incredibly proud to be a truly inclusive school. Nowhere is this commitment more visible than through Treetops, our Base for autism, which we are proud to host within our School and whose learners we seek to integrate fully into the life of the school. Their achievements are our achievements, and vice versa.

Whilst learning is arranged differently in Treetops – with some children spending all their time in one of our dedicated, small classes, some supplementing their Treetops-based learning with structured time in mainstream and some working full-time in mainstream with support – all Treetops children are full and valued members of the school community, and are, of course, full members of the West Wimbledon Primary School role.

As a result, nationally published attainment figures for West Wimbledon Primary School at Key Stage 1 relate to the entire school roll, including those for Treetops children. What this can mean in a two-form entry primary school, such as ours, is that a year group comprising of 60 children might also include five Treetops learners. For many of those five children, attainment at nationally expected levels is unlikely either at the same time or at the same rate as their peers, hence the Education and Health Care plan that provided them with entry to Treetops.

Therefore, the School publishes attainment data both with and without Treetops children, in no sense to exclude those learners: but better to judge the progress and attainment of mainstream classes – which are quite rightly expected both to reach and, in many cases, exceed certain standards – and then for the entire cohort as a whole.

Key Stage 1 Provisional data: 2017

Including all eligible children, including the 5 learners in Treetops

Assessment area	Group	2016 Data	2017 Data
Key Stage 1 Reading	School: at expected standard	80%	78%
